

## Pevco TEC-6™ | Trackable Ergonomic Carrier, 6"

- Easy to Open and Close
- Comfortable to Grip
- Integrated Barcodes
- High Performance Glide Bands
- Durable Construction
- Leak-resistant Seal

# Pevco TEC - 6™ | Trackable Ergonomic Carrier, 6"

## Exclusively for 6" Healthcare Pneumatic Tube Systems

Pevco TEC-6's ergonomic design incorporates well-placed, comfortable hand-holds and contoured ends so healthcare staff can hold and load carriers more efficiently. Red / green latch status indicators help guarantee that carriers are closed properly.

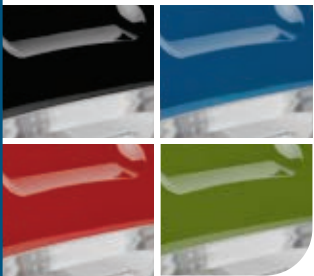

Pevco TEC-6™ also includes integrated barcodes to enable real-time tracking of every delivery. When combined with Pevco Link™, transaction data and arrival confirmation for any carrier – and its contents – is stored in a database and available at stations.

Molded from BPA-free Eastman Tritan™ copolyester, Pevco TEC-6 carriers benefit from the material's durability, lasting clarity and scratch resistance. With long-wearing nylon glide bands, tough hardened steel hinges and Pevco's patented leak-resistant seal, the TEC-6 is built to stand up to the most demanding 24/7 hospital environment.

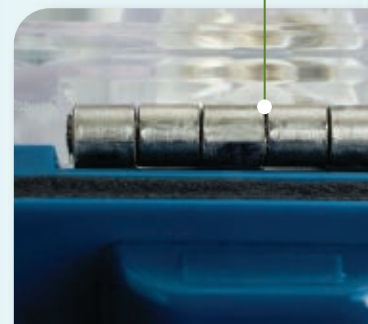

Pevco TEC-6™ carrier is designed to be used with 6" hospital pneumatic tube delivery systems and is available in four color combinations.

Three styles of foam inserts – Pillow, Egg Crate and Thin – are available to cushion fragile cargo.

Pevco TEC-6 is available in 4 color combinations – clear/black, clear/blue, clear/red and clear/green.

Integrated barcode for tracking

Contoured ends make for easy pick up

Conveniently-placed hand-holds

Color-coded latch status indicators

Tough hardened steel hinges

Leak-resistant seal

Dependable low-profile latches
